Cyber Security – Emerging Threats & Solutions

JNIBF had conducted one-day online training program on “Cyber Security – Emerging Threats & Solutions” on January 21, 2022 (Friday). The training program was attended by officials from various organizations in the BFSI sector. The program focused on latest trends in threats & solutions in Cyber Security space.

The program focused on –

- awareness and protection of critical personal & professional data from cyber-attacks
- taking measures for protection of digital payments & social networking and other applications in mobile and desktops,
- understanding the legal framework related to cyber security, taking corrective actions and process of reporting of cyber-attacks/crime to appropriate authorities

The program stressed on practical aspects of the subject and provided a novel experience to the delegates of the program like tips on securing personal and professional data, live malware attack and remote access, live website spoofing and phishing attack, live email spoofing and impersonation, etc.

The sessions were handled by experts in the field viz.

- Shri. Sandeep Tiwari, In-charge, Info Security Projects, NPCI,
- Shri. Amit Kumar Jha, Senior Lead, Fraud Risk Management, NPCI,
- Shri. Kiran Kumar Subuddi, Certified Security Analyst & Ethical Hacker and
- Shri. Ddharaniikota Ssuyodhan, Cyber Laws Expert.

The program was very well received by the delegates and JNIBF would continue to conduct such programs in future.

Shri Sandeep Kumar Sharma, Director-JNIBF addressing the participants during inauguration
